

To the FCC,

The Sinclair effort to demand its affiliates air the anti-Kerry documentary making headlines new reaffirms the public loss of the airwaves being supposedly in the interest of the public in general and able to offer diversity of opinions.

It's the obligation of the FCC to enforce the intentions of our airwaves laws. As a citizen I am fearful of this misuse of broadcast power and beg that our government authority, the FCC, meet its obligations to us.

With thanks for your attention,

E. Sotiropoulos-Foss
